

**Sri J. MOHAMED IMAM.**—May we take it that the entire amount is a loss incurred by the Government which has to be shared by the Iron Works?

**Mr. SPEAKER.**—It is still under consideration. It is too early to say so.

**Sri T. CHANNIAH.**—It is still under consideration. If fuel had been supplied to the Iron Works at tendered rates, they would have had to pay to the Government nearly Rs. 8 lakhs, I believe.

**Sri G. SIVAPPA.**—May I know why these estimates for the repair of these tanks go up and come down? Sometimes they go to the Executive Engineer, sometimes to the Superintending Engineer!

**Sri Kadidal MANJAPPA.**—In the usual course, they go up and come down. The Executive Engineer has got power to sanction; the Superintending Engineer has got power to sanction; it has got to be sanctioned by competent authority.

**Sri G. SIVAPPA.**—A number of times they go up and come down.

**Sri Kadidal MANJAPPA.**—If specific instances are brought to my notice, I will take suitable action.

**Sri G. SIVAPPA.**—Do Government require that the ryots should contribute some percentage if these tanks are to be restored?

**Sri Kadidal MANJAPPA.**—Naturally we expect the ryots to share the cost.

**Sri G. SIVAPPA.**—What is the percentage you impose upon the ryots?

**Mr. SPEAKER.**—There are certain rules. The rates also are fixed.
